OUR FAMOUS UTILITY CUSHIONS

Lightweight weatherproof outdoor pads in shapes and sizes that fit myriad furniture designs in wrought iron, wood, resin and tubular frames. Like their bigger brothers (above), they are fiberfilled with 100% acrylic binder which makes the cushions impervious to moisture and prevents "compression depression": these pads have "bouncebackability" and won't flatten and lose shape from exposure. Covered in Tough Stuff textilene, a breathable open-weave mesh of 100% vinyl-clad nylon, they are virtually impervious to fading, rot and mildew. Because of the "air-conditioned" open-weave and the 100% acrylic filling, rain simply syphons through the cushions. They are dry and ready again for duty within minutes after a rain.

THE BUTTERFLY CHAIR

Perhaps the most popular casual furniture design America has ever produced. The original model by Hardoy (for Knoll Associates) has graced special and permanent Good Design exhibits internationally since its inception in the 1930s. So simple a design — so clever! A deep-seating sling that can be changed instantly, wearing a new face as it goes from outdoors to trendy interiors. An indestructible frame that looks good from any angle.

We have offered the Butterfly Chair and covers for over 40 years. Our exclusive K.D. Butterfly Frame®, made in our own factory, is the size of the original Hardoy/Knoll design. It is tubular steel on a telescoping structure that allows us to send it through UPS and the mails. It requires no tools. Each of the eight sections is color coded and simply, quickly slip together: less than 10 minutes to assemble. We make our own covers too — stronger, sturdier, tougher than anyone else. And we make them in either heavy-weight canvas, Tough Stuff textile plastic as well as leather, and in myriad colors and two sizes to accommodate any size frame that has been made since the Hardoy/Knoll original.

By popular request, we revise **THE BUTTERFLY STOOL:** a 17x17x17" triangular sling cover top on a 17"-high black wrought-iron base. Covers in either canvas or Tough Stuff plastic; in all colors listed opposite for #14C and #14E covers. Canvas or Tough Stuff plastic to match our chair cover.
